VaultSMART

Fast and reliable email archiving

NEW VaultSMART email archiving

Manage all your FuseMail® services in one portal

You've already chosen FuseMail for your email protection service – now you can add cloud-based email archiving to your bundle and manage it all in the FuseMail portal, quickly and easily.

With our all-new VaultSMART email archiving service you can confidently and rapidly retrieve any email from the secure FuseMail email archiving portal.

Compliance and retrieval requirements demand that businesses store more data than ever before. VaultSMART from FuseMail makes archiving and searching your entire email history fast and easy, no matter how much data you need to store.

On-site backups are expensive to maintain, and make the retrieval of archived emails difficult. VaultSMART's cloud based archiving provides an ideal solution for simplifying email retrieval and long-term retention, without creating more work or eating into your IT budget.

One console for all email security

VaultSMART unifies with FuseMail's SecureSMART, ContinuitySMART, and ClickSMART products in a single web interface, enabling complete administration of your email services from a single web console. End users can manage their quarantined emails, access email continuity, and search their personal email archives from one web console.

Features

- Fast and easy to use
- Local datacenters and local support
- All email content is fully indexed and searchable
- Archives internal and external in- and out- going emails
- Enable/disable end user access to personal archives
- Managed access to email archive through new compliance officer role
- *Consolidate email archives by importing email directly into VaultSMART
- All administered within the FuseMail Administration Portal for ease of use

  * Coming soon

Services:

SecureSMART	SecureSMART Suite	ClickSMART	VaultSMART
Email security	Email continuity	URL protection	Email archiving

Peace of mind

VaultSMART is easy to use for administrators, users and compliance officers. All email is securely and reliably captured, retained, and available for later search and retrieval at any time.

Access

Selectively extend the benefits of email archiving to your users to enable them to access and search their own email archive. The administrator can disable the user access to personal archives if needed.

Access for Compliance Officers

Access to your VaultSMART archive is restricted to your company's compliance or privacy officer, ensuring complete separation of email administration from legal review.

Advanced search

The advanced search allows complex queries using a complete set of include/exclude criteria, across all email attributes. You can perform multiple searches with different search criteria and view results in separate tabs.
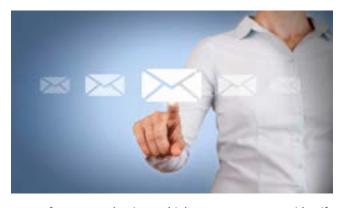

Recurring searches*

Set up recurring, scheduled searches using advanced criteria. This enables you to proactively keep a watchful eye for messages added to VaultSMART containing restricted content or attachments.

Tag messages*

Build cases by quickly tagging messages directly or through search results. Easily recover the results from past searches for further examination. You can add emails to an existing tag to collect messages for a case and assign multiple tags to messages to identify overlapping cases.

* Coming soon

Compliance log for each message

Know exactly what's happening in VaultSMART. Every action performed on a message, whether it is opened, downloaded, redelivered, tagged etc. is recorded in the compliance log for the message.

FuseMail SecureSMART

SecureSMART's multi-layered email security keeps your business safe from known and emerging email based threats, using a combination of custom filters and industry-leading anti-virus, anti-spam and antiphishing engines. SecureSMART also offers businesses a 100% service availability rate, 99.9% of spam identified and quarantined and 0.003% false positives.

FuseMail SecureSMART Suite

Add Always-On email continuity to your email security package for that extra peace of mind. Guarantee your business will never lose access to email - it's your IT insurance policy. SecureSMART Suite also comes with 90 days of email replay.
