
Proofpoint Essentials Release Notes 28 Jan 2020

Overview

We are proud to announce the latest release of Essentials. This release will be rolled out for general availability to all customers by February 3rd, 2020. No actions are required to receive this update.

This update:

Bug Fixes

- Resolves an issue when updating a user via the API whereby requests would fail if the *is_active* field was missing.
- Fixes a SMTP Discovery threshold issue that could stop some users being added to the Discovered list.
- Addresses a user sync issue to better handle UTF8 white space characters in mobile numbers.
