
Proofpoint Essentials Release Notes 27 July 2020

Overview

We are proud to announce the latest release of Essentials. This release will be rolled out for general availability to all customers by July 29th, 2020. No actions are required to receive this update.

This update:

Bug Fixes

- Addresses an issue where SMTP Authentication (Domains) component failed to display for organisation admins.
- Resolves an issue that prevented bulk actions on the log search page from working correctly.
- Corrects an issue with the Social Media Protection feature displaying regardless of its package assignment.
- Fixes an issue whereby some Security Awareness emails were incorrectly quarantined.
- Addresses some minor UI bugs.
