
Proofpoint Essentials Release Notes 19 October 2020

Overview

We are proud to announce the latest release of Essentials. This release will be rolled out for general availability to all customers by October 21st, 2020. No actions are required to receive this update.

This update:

Improvements

- Improves log search performance.
- Increases the log search results from 10 to 100
- Removes the legacy Archive tab from the side bar.
- Adds a new notification template language - Chinese (Traditional) - 中文 (繁體)
- Updates the wording of insensitive terms used in the interface.

Bug Fixes

- Fixes an issue whereby some Active Directory emails included erroneous messages.
- Corrects an issue when adding an IP to Active Directory Sync URL.
- Fixes the disable user button on user's profile page.
- Addresses some minor UI bugs.
